

ENERGY MANAGEMENT POLICY

Polisan Holding aim to apply and develop proactive energy management systems, within the framework of sustainability, in all of their production and service processes of its affiliates.

Based on this framework, we commit for an effective energy management;

- ✓ to comply with all legal and other requirements relating to its processes,
- ✓ to continuously review our performance by monitoring our goals and targets, which are determined in accordance with the basis of continuous improvement, through our energy performance indicators, to improve all our processes by effectively managing risks and opportunities,
- ✓ to review goals and objectives periodically and ensure to provide sufficient information, expert and financial resources to achieve them,
- ✓ regarding to the climate change, being sensitive and taking the necessary measures,
- ✓ to prefer energy efficient technologies and practices in the production and relevant process,
- ✓ to devise projects to lower consumption by monitoring energy quantity,
- ✓ consider energy efficient designs that support the transition to a low carbon economy in our investments,
- ✓ to train our employees, subcontractors and stakeholders to reduce the consumption of natural resources and minimize energy losses, and stakeholders to reduce the consumption of natural resources and minimize energy losses, and use tools that raise awareness.
